TODAY'S PROGRAM:

Fellow Greensburg Rotarian, Alec Italiano, the Director of Planning and Development was our speaker today.

He spoke about the Active Transportation Plan for

Greensburg. This plan was designed to help navigate

the best ways for anyone, not using a vehicle, to get around Greensburg. He passed out literature to demonstrate different processes within this initiative. This included the most requested locations for improvements. Items such as crosswalks, bike lanes and railroad tunnels were at the top of the list. Alec also spoke of how Indiana Township in Allegheny County was handling their tunnels and railroads and hoped to gain further insight from their examples. Thank you, Alec and your team for striving to improve our transportation options throughout our wonderful city.
